

MADAGASCAR

The paradise of biodiversity

The east is a place full of beautiful surprises. Madagascar is qualified as having exceptional ecological richness. It is not surprising that ecotourism is one of the finest assets of the Continent-Isle. The big island has the most visited Protected Areas. They host many species of lemurs and shelter several species of birds, reptiles, insects and batrachians. As for the flora, it is luxuriant vegetation of tropical forests with several varieties of ferns, epiphytes, sacred creepers, orchids and dwarf palm trees.

DAY 1: ANTANANARIVO – ANDASIBE (145km)

Welcome by our representative at Antananarivo.

Departure to ANDASIBE. Along high gorges and plains undulating, the journey to the East is more wooded because of abundant precipitation.

On the way, stop in ZEN GARDEN, the ideal place to relax and enjoy nature. There is a wonderful waterfall and various medicinal plants. Then visit of Pereyras reserve, refuge of many species of chameleons, insects and reptiles typical of the island (amphibians, frogs, snakes). **LUNCH.**

Continuation to Andasibe. Upon arrival, installation at the hotel.

Night tour of the reserve to see the diminutive nocturnal mouse lemur.

Dinner and night at ANDASIBE HOTEL <http://www.andasibehotel-resto.com> or another hotel according to the availability

DAY 2: ANDASIBE

After breakfast incursion into the forest. Andasibe national park is the most visited Park in the island. It is in the forest corridor of the East. Very accessible, It contains a very rich biodiversity and has the distinction of hosting one of the largest species of lemurs of Madagascar: the indri indri, which is part of the attractions of this nature reserve.

Morning visit to see the Indri Indri and hear their haunting singing call as they are crying, and observe birds. The forest of ANALAMAZAOTRA is the sanctuary of the INDRI INDRI and some other lemur species can be seen in the reserve. Extreme rarity of indigenous species of birds. Fern is especially dense: fern, epiphyte plants and an endemic variety of orchids. Interesting walk in cleared paths of a primary forest.**LUNCH**

In the afternoon, visit the private reserve of Vakona in which the Island of Lemur which provides you the opportunity to see closer couple of lemur's species. After some photos in there, continuation to the other park where you'll see crocodiles, birds and the only predator in Madagascar the "Fossa" which looks like Dog, Puma

Dinner and night at ANDASIBE HOTEL <http://www.andasibehotel-resto.com> or another hotel according to the availability

DAY 3: ANDASIBE – MANAMBATO – AKANIN’NY NOFY (138 km)

Breakfast at hotel, then drive to Manambato for the motorboat transfer to Ankanin’ny Nofy passing by the Rasoabe lake. Walk along the white sand beach and the serenity of a wild nature.

Arrival in ANKANIN’NY NOFY, check in. **LUNCH**

A discovery day of the unique region of the Canal of Pangalanes. Visit of the private Reserve of Palmarium and the fishermen villages, which are located on land ridge that separates the sea from the channel. Coming back to the hotel.. Nocturnal visit to discover the smallest lemurs of Madagascar : aye-aye

Dinner and night at PALMARIUM HOTEL www.palmarium.biz

DAY 4: AKANIN’NY NOFY

Breakfast at hotel. Visit of the Palmarium private reserve to see some animal species like free-ranging and tame lemur species on the island, including the largest lemurs, the Indri, as well as the famous dancing sifaka. The area is also home to the emblem of Madagascar, the Ravinala, as well as frogs, reptiles, orchids, palm trees and the carnivorous pitcher plant.

Fullboard accomodation at PALMARIUM HOTEL www.palmarium.biz

DAY 5: AKANIN'NY NOFY – MORAMANGA

After breakfast, leave AKANIN'NY NOFY in early morning. Transfer by motorboat to Manambato.

Direction to Moramanga. Stop on the way for the **PIC NIC LUNCH**.

Arrival at the hotel in Moramanga.

Diner and Night at **BEZANOZANO HOTEL**

DAY 6: MORAMANGA – ANTANANARIVO

After breakfast, leave the hotel and drive back to Antananarivo.
